

mulli

VERSION US 23.1

Assembly instructions Transportation Mat

General Information

With the muli transport mat, you can make even better use of the muli basket. It can be used as an additional loading area above the basket and thus offers a second level of transport volume. For example, the muli can carry a week's shopping and up to two crates of drinks.

The muli transport mat is made entirely from recycled materials. Old car seat belts and old mesh advertising banners are used, giving them a second life. This makes each muli transport mat unique!

WARNING! Risk of injury

Please read these instructions carefully before installing and using the transportation mat.

Continuously updated installation instructions are available in German and in other languages at our download portal:

<https://muli-cycles.de/en/downloads>

→ Regularly check if a current version of your manual is available in the portal.

List of text types and lists used

This manual uses the following text types and lists:

- 1 Instructions (in fixed order)
- Explaining Guidelines (in any order)
- Listings

Symbols / Labels used

This manual uses the following symbols and/or labels:

-  The warning triangle in combination with the word “WARNING” indicates hazards that could result in severe personal injuries or death.
-  The warning triangle in combination with the word “CAUTION” indicates hazards that could result in slight personal injuries and property damages.
-  The circled exclamation mark indicates important additional information.

Safety instructions

 **WARNING! Risk of falling and injury**
The total load of the basket of 154 lbs (70 kg) must never be exceeded, even in combination with the transport mat. Overloading can cause damage to the muli. This can result in serious falls and accidents.

- Never exceed the permissible total weight and the respective load limits for the individual load suspension points.

 **WARNING! Risk of falling and injury**
A higher payload can increase the braking distance. This poses the risk of rear-end collisions.

- Allow for a longer braking distance with a higher payload and adjust your driving and braking behavior accordingly.

 **WARNING! Risk of falling and injury**
The muli transport mat is not suitable for transporting people/children as it is not a proper seat and does not provide a support function.

- Only transport material objects on the muli transport mat.

 **CAUTION! Risk of damage to property**
If the load is not adequately secured, it may fall and be damaged.

- Ensure that the load is adequately secured on the muli transport mat.
- Use tension belts or a transport net for lighter objects.
- Adapt your driving behavior to the respective load condition.

 **CAUTION! Risk of damage to property**
The muli transport mat is designed for a maximum weight of 77 lbs (35 kg). Overloading can cause the locking bars to bend or be damaged.

- Never exceed the maximum weight of 77 lbs (35 kg).

 **WARNING! Risk of falling and injury**
The riding experience can be impaired if the load is incorrectly distributed.

- Make sure that the center of gravity is always as low as possible. If possible, place heavy loads at the bottom.

 **CAUTION! Risk of damage to property**
Incorrect loading can damage the textile fabric of the muli transport mat.

- Do not transport any sharp-edged or pointed objects on the transport mat.

⚠ CAUTION! Risk of damage to property
If the load is not adequately secured on the transport mat, the load may move during the journey and rub through the textile fabric.

→ Tie down and secure the load on the transport mat to prevent chafing.

ⓘ This product is only suitable for use on the “multi” bikes of multi-cycles GmbH.

ⓘ Keep the transportation mat away from fire.

ⓘ Replace all the parts of the transportation mat, if important ones are bent or broken.
Do not continue usage if the transportation mat is defective.

ⓘ Do not modify the transportation mat or any of its parts. It will void the warranty.

ⓘ Please note! The multi transport mat is made from recycled advertising banners. It loses its color in certain places through use and may have color defects from the beginning. This is due to the nature of the material and does not constitute a functional defect.

Scope of delivery

1 x multi transport mat
1 x transport net

Assembly instructions

- 1 Push the locking bars through the two long loops at the ends of the transport mat. (Fig. 1)
- 2 Insert the locking bars into the basket holders in the basket. To do this, pull back the red locking bolts on the basket holders and insert the front locking bar into the basket holders first. If necessary, push the basket wings slightly apart with both hands and secure the bar with the red locking bolt. Then insert the other locking rod into the rear mountings. (Fig. 2)

⚠ CAUTION! Risk of pinching or entrapment.

- 3 Close the locking bolts to secure the bars. (Fig.3)
- ⓘ** If very high pressure is required on the wings so that the bars can be inserted, the bars are set too long and can be shortened by screwing in the end pieces. In this case, loosen the lock rings on the end pieces of the rod and screw in the end pieces slightly. Tighten the lock rings again.

FIG. 1

FIG. 2

FIG. 3

- ⚠ Sollte ein sehr hoher Druck auf die Flügel nötig sein, damit die Stangen eingesetzt werden können, sind die Stangen zu lang eingestellt und können durch Einschrauben der Endstücke verkürzt werden. Löse in diesem Fall die Konterringe an den Endstücken der Stange und drehe die Endstücke etwas ein. Ziehe die Konterringe wieder fest.

Cleaning instructions

- ⚠ Clean only with soap and water.
- In the event, that your transportation mat is not utilized for an extended period of time, we advise that you clean it in accordance with the instructions provided herein and store it in a cool, dry place away from direct sunlight.
 - Please refrain from using detergents or other solvents to clean the canopy.
 - Allow to dry completely before storage.
